

Identifying a TRW EPB brake caliper

Counterfeit spare parts keep appearing on the market. To ensure that you actually have an original TRW spare part, the following pictures show how to identify an EPB brake caliper from TRW. The circles highlight the differences.

In addition to this, there is also an option of verifying the authenticity of the part by using our app. This can be downloaded with a smartphone or tablet from www.trwaftermarket.com. The integrated Teclidentify application (the mobile device has to be connected to the Internet and has to have a QR code scanner) allows you to quickly and clearly ascertain that the unopened product packaging contains an original quality part from TRW.
