

TECHNICAL REPORT

Comparative study about Volvo
valve cover gasket set

PART NUMBERS: 56032800,
56042800 and 56042900

PURPOSE

To point out the main **differences concerning valve cover gasket sets** for D5 Volvo engines.

DEVELOPMENT

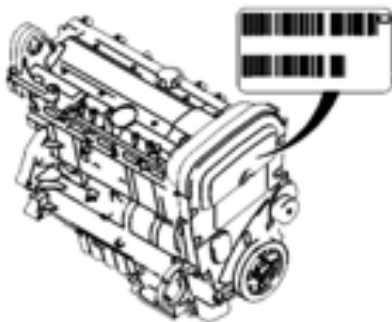

D5244T engine family from the Swedish Manufacturer uses, to seal the valve cover, **different but very similar valve cover gasket sets**; but with some modifications which make them not to be interchangeable. For this, **Ajusa offers 3 different references for this type of engines**. These sets apply to models such as S60, V70, XC70 and XC90 built between 2001 and 2006.

The type of gasket that each vehicle uses depends on the manufacturing engine number. The relationship is as follows:

Sometimes it is common not knowing what engine number we have; so the **purpose of this manual is to heal the Ajusa customers to choose the right gasket set**, comparing the features that make this 3 sets unique.

All sets have been developed using the same manufacturing process and same quality; **the differences**, as you can see, **are in the design of some areas of the gaskets**:

In the following table you can see images of the 3 sets showing the main 3 differences.
