### PTFE Seal Installation

- The Crankshaft Oil Seal included with this pump is designed with PTFE Sealing Technology.
- It is vital the alignment tool is used to position the pump drive onto the crankshaft accurately.
- The PTFE Oil Seal must be installed using the installation sleeve without any Oil or additional lubrication.
- Once installed the Seal must be left for a minimum of 4 hours to allow the seal to form a fluid proof seal.
- More information on PTFE seals can be found on our technical bulletin **LEAF 9257 PTFE Oil Seal Guide**

Best Availability. Best Value.  
Best Quality. Best Service.
